Pentadoku puzzles, 2nd set
by Will Gibson

This booklet contains 8 more Pentadoku puzzles (and their solutions).

Pentadoku puzzles are similar to Sudoku puzzles.

The goal of a Pentadoku puzzle is to fill each empty square with a number so that every row, every column and every irregularly-shaped region (with thick borders) contains all the numbers 1, 2, 3, 4 and 5 exactly once.

A sample puzzle and its solution is given below.
